

Hand Sanitizer Machine Dispenser & Digital Signage

As the coronavirus is spreading around the world, we should definitely sanitize our hands as many times as possible.

Whether you are in a company, airport, hospital, restaurant, bar, or gym, this smart machine can help you sanitize your hands in just a few seconds.

You don't need to touch anything to get hand sanitizer, and the screen will even play a tutorial video for you.

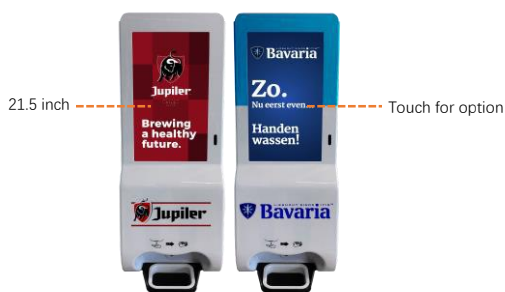

In addition to its health benefits, the advertising revenue coming with it can help us move towards economic recovery as well.

Features

IR Sensor

IR sensor for automatic dosing, clean, safe and completely touch-free.

LCD Display

21.5 inch HD IPS LCD screen for advertising display and more, touch is optional.

Hand Sanitizer Tank

1000 ml volume capacity of hand sanitizer tank, and different nozzles for various types of sanitizers.

Installation

Wall mounting and floor standing installation are both available.

Application

Restaurant

Airport

Retail

Corporation

Hospital

Gym

Entertainment

Meeting Room

Digital Signage Software

DSM80 software is the trustworthy platform to build a successful digital signage system. It offers rich features and functionality with intuitive interface and easy-to-use tools, helping you to deliver an awe-inspiring digital signage experience.

Build

- Build for ordinary display, video wall or stretched display
- Choose the appropriate resolution and screen orientation
- Templates are available
- Drag-and-drop tools
- What you see is what you get
- Video, image, text, html, rss, live feeds, IP streams and more
- Intuitive and flexible playlist
- Powerful scheduling function
- Interactive content for touch screen, scanner, motion sensor, etc
- Preview before publishing

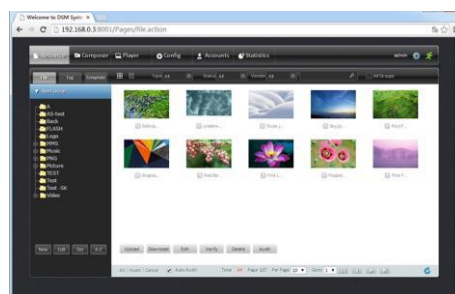

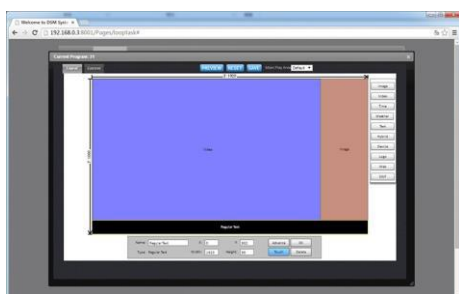

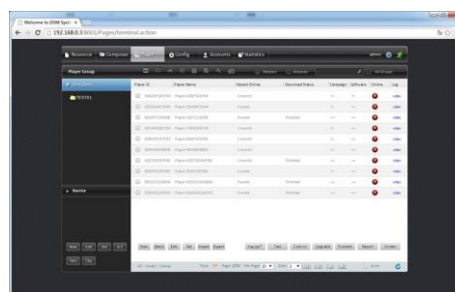

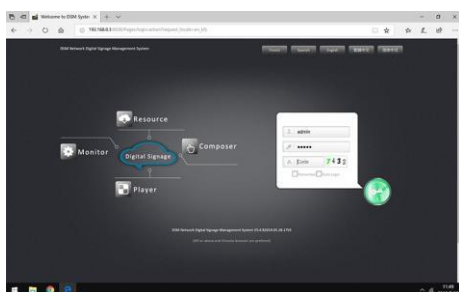

Publish

- Everything is packaged for one button publishing
- Distribution via networking or removable storage device
- Separate the processes of building and publishing
- Auditing before publishing for teamwork and safety
- Modify your presentation anytime to get instant result
- Publish once and get updates forever without republishing
- Use tag function for automatic updating after file changing

Network

- Server can be located in cloud or local
- No limit on the network, location, or number of players
- Web based interface and login authentication
- Monitor the status of players remotely
- Control and manage players remotely
- Playback statistics of players and files
- Account permissions and user logs

Specifications

Model	BV-HS215b
LCD Screen	
Size	21.5 inch BOE Panel
Resolution	1920 x 1080
Display Area	476.64 x 268.11 mm
Brightness	280nits
Viewing Angle	178°/178°
Colour	16.7M
Structure	
Sensor	Auto dispense by sensor with open serial port (user-defined)
Mechanism	Automatically squeeze sanitizer and interactive advertising through a sensor
Hand sanitizer tank	1000 ml volume capacity
Touch screen	Optional (interactive demand)
Motor lifespan	Over 50 thousand times
Material	Metal housing
